Drainage Technology

Product Catalogue

ABOUT US

Expectation and excellence come from a place which has been known to deliver the same. **LIDCO** , a premier parallel venture of **AMEET** Group is in continuation of the legacy created by this EPC giant.

With a dynamic and driven group of young designers & engineers we provide complete solutions to all your drainage problems.

From tackling residential and commercial set ups, our integrated systems have been immensely successful in public set ups like amusement & theme parks.

We are manufacturers of Drain Channels, Balcony Drains, Shower Channels, Floor Drains, Cockroach Traps and S.S. Gratings.

With our designs, drainage is an automatic & continuous process, sparing you the trouble of manually doing it later.

We work towards improving your experience, be it at home, office or industrial site.

We do not aim to just satisfy, but push the border of satisfaction to finally peak at excellence.

LIDCO Drain Channel

LIDCO Drains Channels are a state of the art system, designed to be installed in wide outdoor open areas as well as indoor areas.

This facilitates easy drainage of water and sludge without additional architectural modifications.

Unlike the point drainage system, that requires the floor of the roof, balcony or space to be inclined towards the drain to allow gravitational drainage, the linear drain fits snugly into peripheries without sloping the floors.

It is installed on top of the concrete slab or tiles and lies flush with the floor.

Apart from being functional, these are extremely aesthetic too and will be a big value addition on the looks of your space.

We offer premium quality and cost effective solutions for productive drainage of surface water.

Best performance is guaranteed with:

1. Corrosion resistant material
2. Customized sizing and dimensions
3. Best flow rates
4. Detachable grating for easy cleaning of drains
5. Wear Resistance
6. Safety considerations like folded edges
7. Varied options of color for aesthetics
8. Modular and speed installation

While the base is made in Nylon, the upper attachment comes in 3 types of Grating Options-

- Nylon/HDPE
- Galvanized Steel/ Stainless Steel 304 & 316
- Ductile Iron

Slot Line Drain Channel

Perfect for balconies, terraces and pool edges this has good mechanical and heat resistance. Extremely resistant to chemical and atmospheric agents, acids, salts, alkalis, petrol and oil, they can be effectively installed in indoor infrastructural areas.

Bottom channel consists of nylon material or polymer concrete whereas the top slot grating is made in Galvanized steel or Stainless Steel 304.

Slot Height (mm)	35 70 100
Channel Width (mm)	100 140 140 160
Channel Height (mm)	55 80 100 200
Outlet (mm)	50 75 100

#1102100 - Galvanized Steel Slot Channel

#1103100 - Stainless Steel 304 & 316 Slot Channel

External Drain Channel in Nylon/HDPE

Perfect for balconies, terraces and pool edges this has good mechanical and heat resistance. Extremely resistant to chemical and atmospheric agents, acids, salts, alkalis, petrol and oil, they can be effectively installed in indoor infrastructural areas.

Depth (mm)	55 80 100 200
Outlet (mm)	50 75 100

External Drain Channel in

Galvanized Steel/ Stainless Steel 304 & 316

Designed keeping in mind high traffic areas like amusement and theme parks, entertainment centers, building corridors, landscapes and pedestrian walks, they make for elegantly finished drains that are strong and corrosion resistant.

#1101100

Width (mm)	100 140 140 160
Depth (mm)	55 80 100 200
Outlet (mm)	50 75 100

RECESSED MANHOLE COVERS

Available in Galvanized Steel and Stainless Steel 304 and 316.

These are available from loadclass A (Human Load),
Load Class B (Car Load) upto Load class D (Truck Load).

High on aesthetics and utility, Application areas include-
Manhole Chamber Covers, Road side Storm Water Drainage Covers,
Duct covers, and Others.

Product Comes with 2 Screwed Lifting Keys for in Operation and Maintenance.

The product comes in different sizes of
**300x300 mm, 450x450 mm , 600x600 mm ,
600x900mm, 750x750 mm, 1000x800 mm and others.**

Customized sizes also available.

#3104 - Galvanized Steel Manhole Covers

#1104 - Stainless Steel 304 & 316 Manhole Covers

Linear Drainage System

Made from the best quality AISI 316 Marine Grade Stainless Steel, LIDCO linear drains are highly corrosion resistant and non magnetic, thus preserving functionality and preventing spoiling of aesthetics of your shower space.

The channel is optimally designed to allow the inflow of water in only one direction, keeping your bathroom clean and hygienic.

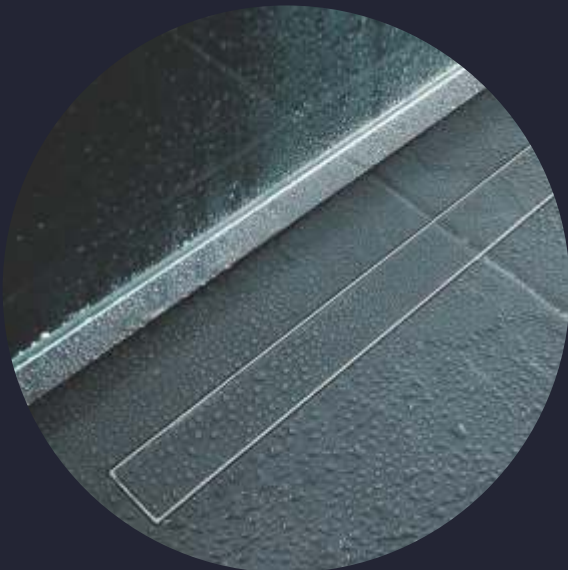

Shower Drain Channel

“Your One Stop Drainage Solution”

Tile / Marble / Stone Insert Shower Channel

Stainless Steel 316

#12011

Width (mm)	75	85	115
Outlet (mm)	50	65	95

*The product comes in different lengths of
300 mm, 450 mm , 600 mm , 750 mm,
900 mm , 1000 mm & 1200 mm each.*

**Customized sizes and color variants also available.
Inclusive of Anti Cockroach and Foul Trap**

Stainless Steel 316

Check Pattern Shower Channel

#12021

Width (mm)	75	85	115
Outlet (mm)	50	65	95

The product comes in different lengths of 300 mm, 450 mm , 600 mm , 750 mm, 900 mm , 1000 mm & 1200 mm each. Customized sizes and color variants also available. Inclusive of Anti Cockroach and Foul Trap 

Smooth Shower Channel

#12031

Stainless Steel 316

Wave Pattern Shower Channel

#12041

Width (mm)	75	85	115
Outlet (mm)	50	65	95

The product comes in different lengths of 300 mm, 450 mm , 600 mm , 750 mm, 900 mm , 1000 mm & 1200 mm each.

Customized sizes and color variants also available.

Inclusive of Anti Cockroach and Foul Trap 

All Drains Available In Following Finishes :

Gold

Bronze

Antique

Black

Point Drainage System

LIDCO Point Drains optimally combine the design, functionality and aesthetic needs of drainage systems.

Because of their inconspicuous size they can be used in the bathroom, terrace, basement, kitchen or wherever required.

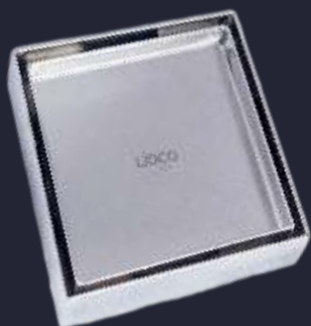

Made from the best quality AISI 316 Marine Grade Stainless Steel, these are efficient, durable, versatile and the most popular designs

“Inclined at the leading edge of drainage”

Nova With Hole S -127
127 X 127 mm (5")

Available in 5 Inch and 6 Inch Square Options.

Stainless Steel Square Gratings

This design is a take on the square grating and is made out of Superior Grade Stainless Steel which makes these corrosion resistant and non magnetic.

Suitable for a variety of environment because of their many advantages, you can install them in not only your shower enclosure but also your bathrooms, kitchens, wet rooms, basements and terraces for smooth drainage of water.

Perfect for rough use due to its highly stable and sturdy structure, these can be set up in industrial areas & public places such as water and amusement parks.

These are one of our most sought after installations for their many benefits and durability.
